- Search in real-time – no queuing or waiting for results

- Utilize best-in-class case management for organizing discovery

- Analyze risks and costs with detailed early case assessment (ECA)

- Run document reviews within the archive without needing to export

- Drive discovery with customizable workflows

- Reduce corporate risk with defensible disposition

- Audit all actions and data with detailed reports and logging

- Scale to support even the largest litigation and investigation needs

SEARCH EVERYTHING

CAS Discovery allows users to search all sources - email, files, documents, SharePoint… over 400 sources and types in all, including IM and Social Media via our partner Actiance, all from a single secure feature-rich discovery client.

Capax Archive Solutions™ (CAS) delivers industry-leading information governance with comprehensive and easy-to-use discovery. Featuring updated capabilities to meet today's litigation and regulatory obligations, data from across an organization can be rapidly searched, preserved, reviewed and exported.

Discovery timelines have been shortened and early case assessment (ECA) is now more important than ever. Our fast, accurate and repeatable search allows you to rapidly search terabytes of data with advanced concept search technology to answer questions such as, "Is there a case here?". CAS Discovery delivers real-time ECA to front load eDiscovery and prepare your team for discovery conferences, a predictive cost/benefit model to help define what is proportional to the needs of the case, and technology to help prove reasonableness by quickly finding and preserving only relevant ESI without spoliation.
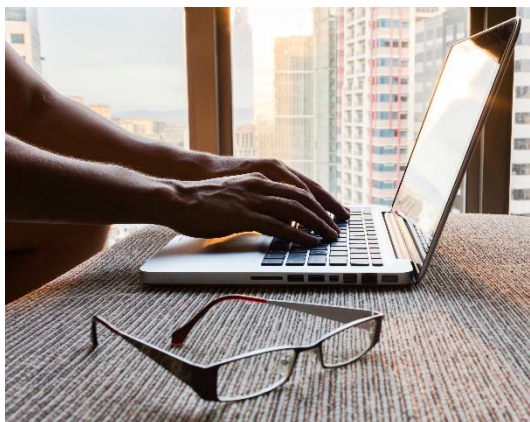

CAS offers self-service for legal professionals to easily conduct discovery without requiring IT assistance. Legal teams can develop smart discovery strategies by quickly assessing discovery search parameters with sophisticated analysis and reports on discovery volumes and associated costs. For legal hold, CAS Discovery is a powerful tool to define and track ESI retention and preservation.

SUPPORT FOR 2015 FRCP AMENDMENTS
The FRCP were recently amended, including modifying key "rules of the road" for conducting electronic discovery. CAS fully supports these new FRCP obligations, equipping legal teams with advanced tools to control discovery costs and risks.

COLLECT AND EXPORT DATA IN UNDER 5 MINUTES
Designed for speed, easy-to-use CAS enables legal professionals to search, identify, and export content in mere minutes. CAS Discovery's self-service design eliminates the need for IT involvement in routine legal matters. Users can search in real time without waiting or queueing for results and can export to common formats such as EDRM XML.

ABOUT CAPAX DISCOVERY

Capax Discovery helps its customers reduce information governance costs and risks while maximizing data value. Capax is the industry leader in providing archiving, information management, discovery, and compliance solutions for litigation and regulatory requirements. CASE MANAGEMENT AND LEGAL HOLDS

CAS offers advanced case management that enables legal teams to easily track and associate their discovery activities to specific matters. Take advantage of sophisticated workflows to effortlessly manage fact research, document reviews and productions. CAS also allows you to apply and enforce legal holds to secure and preserve data efficiently. Suspend deletion of content for e-discovery via targeted keywords or metadata, or simply lock down the content for an entire custodian or department.

ADVANCED MACHINE LEARNING

CAS Discovery's integrated machine learning and concept-matching technology delivers greater relevancy, enabling visualization of your data and associated concepts.

About CAS

CAS is an enterprise-grade, scalable and comprehensive archive software solution, bringing order to information chaos by putting you in control of your data.

CAS delivers industry-leading information governance for the entire enterprise. Data from across an organization can be rapidly searched, preserved, and managed with innovative modules for electronic discovery, compliance, dark data analysis, and audio-video.
