Trusted. Proven. Secure.
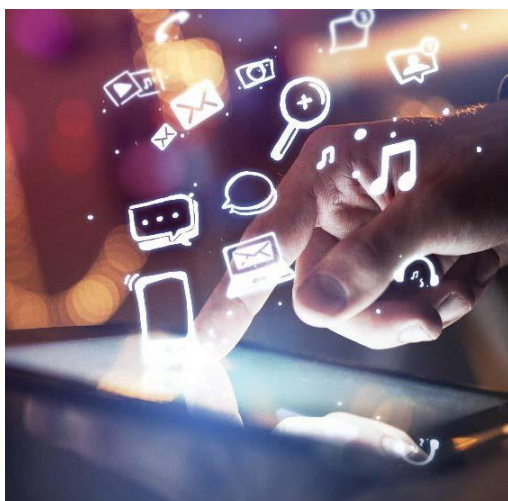

CAPAX ARCHIVE SOLUTIONS

Capax Archive Solutions is pleased to announce that CAS 2017 R1 has been released. The CAS 2017 R1 release marks another exciting evolution of our flagship information governance and compliance platform. With significant new features including an archive bridge version for NearPoint, support for Office 365 journal archival, CAS for OWA support for Mac users, as well as a number of other wide ranging platform enhancements.

We are also excited to announce our strategic partnership with **GlobalNet** for legacy archive data migrations and expanded extensibility for the archival of IM and social media based content.

As always customer input is intrinsic to Capax. The product roadmap is dynamic and will evolve based on customer feedback.

PRODUCT SUPPORT

▪ Capax Archive Solutions will continue to provide direct technical support and professional services to the CAS customer base.

▪ Customers with version 6.9 or earlier will be required to upgrade to 7.0 or later to maintain standard support beyond 2017.

▪ Prior releases will be supported per the CAS Support Roadmap diagram below and the customer's current support contract.

▪ The CAS Roadmap is designed to track closely with the Microsoft platform release schedule and we provide compatibility for the respective Microsoft platforms on a best effort basis - as such, supportability dates are subject to change.

▪ Upgrade assistance can be provided by Capax Archive Solutions. Please contact support for further information.

▪ Capax recommends that you upgrade to the latest version of CAS to take advantage of new features, performance enhancements and fixes to ensure optimal efficiency and platform capability.

CAS SUPPORT ROADMAP
